## SCOPE OF ICECSD-24

The First International Conference on Energy Conservation and Sustainable Development Using AI-(ICECSD-2024) serves as a nexus for researchers, policymakers, and industry professionals to collaborate on pressing environmental and energy challenges.

Focusing on the latest innovations in renewable energy, energy efficiency, and environmental protection, the conference aims to accelerate the global transition towards sustainability.

Participants share cutting-edge research, best practices, and emerging technologies. The interdisciplinary nature of ICECSD-2024 fosters a holistic understanding of the interplay between energy production, consumption, and environmental impacts. Through fostering dialogue and collaboration, the event contributes to the formulation of effective policies and the evolution of sustainable technologies, ensuring a greener future for all.

## TRACKS OF THE CONFERENCE
