Courage

- Courage to take RISK. (Higher the risk, higher the reward.)
- Courage to fight ODDS.
- Courage to be FAIL.

Fire

- Consistent Fire
- Always show up even if you feel low.

Passion

- Passion for coding if you are from CS/IT
- For others, it can be different.

https://www.codechef.com/problems/COCONUT
Read problem statements in Vietnamese,
Bengali, Mandarin Chinese, and Russian as well.
Chefland has 2 different types of coconut, type A and type B. Type A contains only x_a milliliters of coconut water and type B contains only x_b grams of coconut pulp. Chef's nutritionist has advised him to consume X_a milliliters of coconut water and X_b grams of coconut pulp every week in the summer. Find the total number of coconuts (type A + type B) that Chef should buy each week to keep himself active in the hot weather.
Input
The first line contains an integer T, the number of test cases. Then the test cases follow.
Each test case contains a single line of input, four integers x_a, x_b, X_a, X_b.
Output
For each test case, output in a single line the answer to the problem.
Constraints
$1 \leq T \leq 15000$
$100 \leq x_a \leq 200$
$400 \leq x_b \leq 500$
$1000 \leq X_a \leq 1200$
$1000 \leq X_b \leq 1500$
x_a divides X_a.
x_b divides X_b.

PROTECTING AGAINST SQL INJECTION
SQL injection is a type of injection attack. Injection attacks occur when maliciously crafted inputs are submitted by an attacker, causing an application to perform an unintended action. Because of the ubiquity of SQL databases, SQL injection is one of the most common types of attack on the internet.
If you only have time to protect yourself against one vulnerability, you should be checking for SQL injection vulnerabilities in your codebase!
