Venue: ZOOM MEETING

Objective:

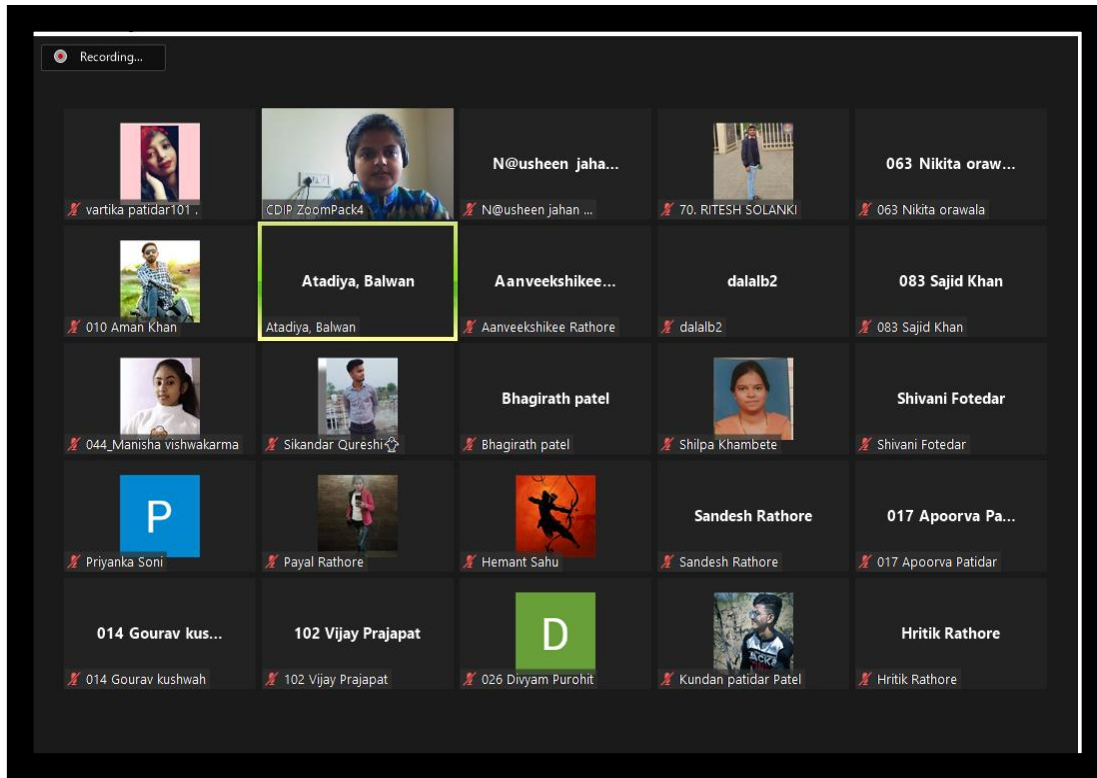

The objective of the workshop was to create awareness among the students about the financial world, emphasizing on need for both gender to gain knowledge in Financial Management.

The students must be aware about the various financial investment options and how to participate in them.

Financial literacy is the ability to make informed judgments and to make effective decisions regarding the use and management of money.” For this CDGI organized webinar on **Awareness on Financial Literacy**. The webinar on Financial Literacy was conducted online by renowned faculty **CA Jeena Agrawal**, on 28th January from 1 PM to 2 PM which was attended by 83 participants. She guided the participants on short term investment, SIP and mutual Fund. How the small investment can make you financially stable in long run was emphasized by her. The students have participated with a lot of zeal and enthusiasm.

The speaker discussed the following:

1. Financial literacy is the ability to understand and effectively use **financial skills**. These financial skills are as simple as budgeting, investing, credit management, and financial management. In other words, financial literacy is the ability to manage money. A strong foundation of these financial skills will help in achieving various life goals like retirement, education, and even going on a vacation.
2. Financial literacy includes many skills. However, the most popular ones are budgeting, managing expenses, paying off debt and understanding the risk return trade off in **investment products**. Acquiring these skills would require one to understand the basic financial concepts like time value of money, compound interest, annualized return and opportunity cost.
3. With an abundance of credit products available in the market like credit card debt, overdraft facility on debit cards, and EMI, financial literacy becomes important. Understanding debt and having basic **financial knowledge** will help individuals to use these products responsibly.
4. Financial literacy often teaches individuals how to make **major financial decisions**. Moreover, it increases financial discipline and financial capability. This will lead to major lifestyle changes like saving and investing regularly, managing debts effectively and fulfilling life goals efficiently. Additionally, financial literacy will ensure one's financial wellbeing and also protect individuals from financial frauds.
