## World Environment Day 2018

**5<sup>th</sup> June is celebrated as World Environment Day** each year by the United Nations. This year's theme is; "Beating Plastic Pollution". Plastic is destroying the earth and sea beds. We need to be responsible citizens and use plastic responsibly.

Our Environment is our asset, which we pass down to our children and the generations to come. As responsible citizens we cannot destroy the environment by using plastic, polythene bags, destroy our rivers and water bodies and cut down trees, are only some of them. Please see the picture of the flower carefully. It has a grass hopper sitting so peacefully underneath the petals. It is his peaceful habitat. We have no right to destroy this delicate balance.

## **The United Nations Message this year is,"Beating Plastic Pollution".**

In CDGI we are proud to say that we have promoted Green Energy by using Solar Energy.

My request to all of you is to begin this crusade from your own efforts that you will be proud of. Make an effort to contribute to the Environment and NOT destroy it any further.

You will be proud to know that India is host this year for the World Environment 2018, declared by UN. So let's make our country proud by marching ahead with a **Green Mission**.

Best regards.
